

including in said composition a colloidal dispersion comprising particles that are solid at room temperature and stabilized with at least one dispersant, the particles being chosen from pigments, nacles, fillers, and mixtures thereof, and

including in said composition a dispersion comprising polymer particles that are surface-stabilized in the at least one liquid fatty phase with at least one stabilizer.

74. (New) A process for providing a uniform appearance to a composition comprising at least one liquid fatty phase for application to a keratin material, said process comprising:

171 including in said composition a colloidal dispersion comprising particles that are solid at room temperature and stabilized with at least one dispersant, the particles being chosen from pigments, nacles, fillers, and mixtures thereof, and

including in said composition a dispersion comprising polymer particles that are surface-stabilized in the at least one liquid fatty phase with at least one stabilizer.

REMARKS

Claims 1-35 have been cancelled without prejudice or disclaimer. New claims 36-74 have been added to more particularly point out and distinctly claim that which Applicants consider to be the invention. No new matter has been added by these amendments. Accordingly, Applicants now await an action on the merits.

If there is any fee due in connection with the filing of this Preliminary Amendment, please charge the fee to our Deposit Account No. 06-0916.

Respectfully submitted,

FINNEGAN, HENDERSON, FARABOW,
GARRETT & DUNNER, L.L.P.
